SUMMARY

I'm a creative junior web developer and designer, adept at working with modern web development technologies, designing applications and writing clean and scalable code. With a proven ability in self-directed learning and adapting in collaborative environments while delivering quality results under strict deadlines, I'm able to make a positive impact under any circumstances.

Former QA Project Lead with 4 years of experience in Gaming FQA and 2.5 years in Leadership and Project Coordination with strong technical, communication and leadership skills, involved in highly acclaimed Indie and AAA video games.

SKILLS

HTML
CSS
Javascript
React.js
Typescript
Node.js
Express
LLMs
Git
Figma
Nginx
Jira

PROJECTS

Jobsquire - www.jobsquire.razvandoandes.com

Created a Full Stack application using HTML, CSS, vanilla JS, Node.js and Express with an integrated AI model. The application uses custom Puppeteer web scrapers to search through websites for job offers based on the user's criteria, and the results can be further filtered using the integrated AI model and/or downloaded locally.

Personal Website - www.razvandoandes.com

Fully designed and programmed my personal website. During its creation I deepened my modern design knowledge, learned how to deploy a custom domain, how to set up web hosting, a VPS and SSL.

FQA Projects

I worked with major game developers and publishers and was involved in the production of highly anticipated and acclaimed titles such as S.T.A.L.K.E.R. 2, Lord of the Rings: Return to Moria, Ruined King: A League of Legends Story and Mandragora: WOTW.

EXPERIENCE

QA Project Lead

Testronic Bucharest

August 2023 - December 2025

- Co-lead a large <40 member team, assumed ownership of the QA activity and delivery for specific processes.
- Solely lead a small <10 member team and exceeded client expectations in terms of work quantity, responsiveness and overall results quality.
- Conducted performance evaluations for the team members I was supervising.
- Handled onboarding of new technicians on the team, documentation and guide creation.
- Submitted Milestone Reports, designed Testplans and established project-wide procedures.
- Organized client meetings for QA workload planning, project updates and risk management.

QA Technician / Analyst

Testronic Bucharest

February 2022 - July 2023

- Performed QA responsibilities such as Bug Reporting, Smoke Testing, Regression Testing, Sanity Checks.
- Responsible for Daily/Weekly client reports.
- Communicated and coordinated constantly with cross-functional and cross-country teams.
